## AGENDA

Industry leaders and speakers from corporations, leading-edge research institutions and FormFactor share test insights on a wide variety of emerging applications, such as 5G, trends in advanced packages, and millimeter-wave measurement and calibration. Topics includes:

- The Advancement of THz Test & Measurement Equipment for 5G, 6G and Beyond (Virginia Diodes, Inc.)
- Load-pull Probe Station for Characterization of 5G Devices and Circuits at Wafer-Level
- Generation, Fine Pitch HBM Cube Testing, from Characterization to Production
- 1/f Noise Challenges and Solutions (Keysight Technologies)
- ADR Cryostats and 4 K Cryogenic Probe Stations (High Precision Devices, Inc.)
- Surface Metrology for Advanced Packaging Applications (FRT GmbH)
- 5G and mmW Applications

[Visit our website](#) for more information on these sessions and to register.
